DTB to Host Military Standard 810G (MIL-STD-810G) Testing

Course Presented by Steve Brenner

On November 16-19, 2009 Steve Brenner will present a course in the understanding, planning and performing Climatic and Dynamic tests here at the Dayton T. Brown Inc. training facility, which is located at 1195 Church Street, Bohemia, NY 11716.

With almost 60 years of experience, Dayton T. Brown is proud to be the training facility for the [Equipment Reliability Institute](#) course. With our extensive knowledge, capabilities and use of this standard, DTB is the perfect location to host this course. Course attendees will not only learn the functions of [MIL-STD-810](#) but will receive a Climatics lab demonstration.

This four day course is intended for people who need to perform, witness or specify environmental testing in accordance with the standard. This course will help you understand the purpose of each test, equipment requirements, and methodology to apply the specified test requirements.

Complete course details and a Registration Form are on the Equipment Reliability Institute Web Site, http://www.equipment-reliability.com/mil-std_course2.html.
