### **Dayton T. Brown Inc. wins contract to develop US Navy Aircraft Prototypes**

September 12, 2011; Dayton T. Brown, Inc. (DTB) and team member VSE Corporation have been selected to develop a wide range of subsystems and components for existing, and advanced US Navy aircraft. DTB draws on over 60 years of experience in Engineering and Testing work with military fixed wing and rotary aircraft, and a proven focus of delivering high quality solutions for our warfighters.

Work will be performed within the Aircraft Prototype Facility (APF) located at Naval Air Station Patuxent River, as well as DTB's laboratory on Long Island. The APF is designed to house a diversity of projects. Platforms include, but will not be limited to, F/A-18, E-2, V-22, EA-6B, the MH-60R/S and Unmanned Air Vehicles of many varieties. DTB and VSE will design and fabricate the aircraft modification prototypes, according to customer requirements, with the typical product being a prototype, validation and verification of the system or unit, along with a set of engineering drawings and data sufficient to perform large quantity replication of the system or unit developed. The multiple year/multiple award IDIQ contract value is \$219,875,168.

Dayton T. Brown, Inc. operates a state of the art Engineering and Testing Laboratory on 32 acres in Bohemia, Long Island that can replicate any environment in the world or space and any dynamic condition experienced by military equipment. Furthermore, DTB provides a full spectrum of advanced EMI, EMC, and power quality testing capabilities and provides development and testing services for armament, ballistic weapons, and armor to enhance mission capability and survivability.

The International Group of VSE Corporation provides global field engineering, logistics, and program management services to the US military and other government agencies. VSE Corporation is headquartered in Alexandria, VA, and is a diversified Federal Services company. With over 52 years of experience, VSE supports our allied warfighters around the world, and delivers skilled professionals, next-generation innovation and leading-edge technology to enhance the overall effectiveness of our clients and allies. VSE Corporation has five wholly owned subsidiaries: Energetics Incorporated (1995); ICRC (2007); G&B Solutions, Inc. (2008); Akimeka, LLC (2010); and Wheeler Brothers, Inc. (2011).
