QUALITY OBJECTIVES

The following are the quality objectives for Dayton T. Brown, Inc:

- Provide quality products and services that meet or exceed the needs and expectations of our customers.
- Make certain that employees understand the importance of the confidentiality of all our customers' information.
- Develop a quality system, based on ANSI/ISO/ASQ Q9001, AS9100, and where applicable, MIL-Q-9858A and ISO/IEC 17025 standards, to foster continuous process improvement and problem prevention, as well as detection.
- Define and implement our quality system based upon employee involvement and commitment to excellence.
- Give all employees the training and support needed to provide quality products and services to all customers.
- Communicate our mission and quality objectives to all employees, and assign individual responsibilities and accountability.
- Use statistical methods to monitor quality performance and isolate major problems for immediate solution, as applicable.
- Establish and maintain a working environment that supports the production and delivery of high quality products and services.
- Form relationships with both customers and suppliers that will improve quality in all aspects of product usage and purchased parts.
- Develop and maintain a team approach that emphasizes enhancing the competitiveness of the company through increased quality and productivity.
- Provide an atmosphere that encourages every employee to achieve his or her full potential and pride in workmanship.

QUALITY EXPERIENCE

With over 65 years of experience, Dayton T. Brown, Inc. is truly a one stop shop. We have a quality control test center at our facility. Dayton T. Brown, Inc. is one of the nation's largest and most thoroughly equipped independently-owned laboratories of its kind; providing a complete range of dynamic, environmental, atmospheric, ballistics, electromagnetic, fatigue engineering and testing services all in one convenient location. Dayton T. Brown, Inc. also provides contract manufacturing. We design and manufacture test systems and in-process test equipment for testing and maintenance. We've developed systems for hydraulic and pneumatic actuators, fuel systems, transmission controls, brakes, cab systems, oil pumps, water pumps, sensors, valves, electrical and electronic controls, electric motors and more. Our Technical Services Division with their subject matter expertise, experienced personnel and management can provide you with document management and support services to meet your document development needs. In addition, a fully documented calibration laboratory, which meets the requirements of ANSI/NCSL Z540.1 and ISO/IEC 17025, augments DTB's services. The Quality Assurance Department is staffed by a Quality Engineer, ASQ certified quality auditor and ASQ certified manager of quality/organizational excellence.

QUALITY PROGRAM

Dayton T. Brown, Inc. has achieved the following:

- ISO 9001:2008 and AS9100C Registered.
